

C. B. Gitty's

Easy Ukulele Chords

These are some of the easiest to play and most common chords for playing songs on your cigar box ukulele or other uke-related instrument, tuned to the standard gCEA tuning.

A 	A7 	Am 	B 	B7 	Bm
C 	C7 	D 	D7 	Dm 	Eb
E 	E7 	Em 	F 	F7 	Fm
G 	G7 	Gm 			

How to Use These Chord Forms

The vertical lines represent the four strings of the ukulele, g C E A from left to right. The horizontal lines represent the frets. For all of these chords, the top horizontal line represents the nut.

An open circle at the top of a string means that string should be left open and strummed along with the rest of the strings. An X at the top of the string (like on the E chord) means that string should be muted/ not strummed.

Some chords (B, Bm, D, D7, E) require partial "barring" - using one finger to hold down multiple strings. Usually this is done with the index finger, and less often the third (ring) finger.
